HUSKEY™ ENCLOSED MOLY GEAR OILS

DESCRIPTION

HUSKEY MOLY GEAR OILS are all-purpose extreme oils fortified with colloidal moly. They are made from the highest quality selected base oils and additives available. **HUSKEY MOLY GEAR OILS** have been compounded to be more reliable and last longer even under the toughest conditions. These high quality oils have been compounded to give easier gear action during colder temperatures and yet give extra protection in high temperature applications. **HUSKEY MOLY GEAR OILS** meet or exceed most *major specifications and perform to almost all equipment requirements.

USAGE

HUSKEY MOLY GEAR OILS are extremely versatile; formulated to take over where conventional oils leave off. These oils may be used on all worm, spur, herringbone and planetary gears. They were designed primarily for harsh conditions found in industrial gear applications, but are excellent for automotive and agricultural uses, such as: manual transmissions, differentials, steering boxes, etc.

ADVANTAGES

ALL-PURPOSE: Engineered to fit a wide variety of applications even under the most demanding conditions.

PLATING ACTION: Fortified with sub-micron size moly particles, which impregnate the metal surface, filling in metal imperfections. Adds new life to old gears and extended life to new ones.

FRICITION IS LOWERED: by the unique quality of moly reducing contact area temperature resulting in increased working life of both the oils and gears.

COST REDUCTION: is accomplished by increased parts life, less down time and extended lubricating cycles.

- * Meets API GL-4, GL-5 and MT-1 requirements
- * Meets Mil-PRF-2105E requirements
- * Meets SAE J 2360 requirements
- * Meets U.S. Steel Specification 224
- * Meets AGMA 250.04 requirements
- * Meets Mack GO-J requirements

HUSKEY Specialty Lubricants

manufactured by HUSK-ITT Corporation / SPECIALTY LUBRICANTS Corporation
